

Welburn Hall Weekly

Friday 12th March 2021

Welburn Hall School

Happy Friday Everyone! What a lovely week it has been having all of our children back with us and seeing lots of happy faces. We have returned to some kind of normality and our staff have worked hard to ensure that we get back on track with our curricular activities.

College onsite work experience has started again. As you can see, the students have been working hard clearing the potato beds and spring-cleaning the traffic signs.

Jamie has been out with the tuck shop trolley independently. He has confidently taken orders, served the food, counted the money and given the correct change.

Well done Jamie we are very proud of you!

KS5 have organised two fundraising events to raise money for their Pete Rigg outdoor residential this year.

The first is an Easter Egg raffle - pay a pound a strip and be in to win some Easter treats. All of which were donated to us. We would love to say thank you to Watermark Plumbing Supplies who donated lots of eggs and to everybody else who was kind enough to contribute also.

The draw will be held on the 26th of March so if you do not have raffle tickets there is still time.

The second is “Guess the name of the Teddy Bear” - pay a pound a name and be in to win this teddy bear! If you wish to be sent a copy of the name list please contact Reception on admin@welburn-hall.n-yorks.sch.uk or 01751 431 218

Lower Semi-Formal tested different materials to see if they absorb or repel water. The outcomes were not as they had anticipated and the children had great fun.

Mothering Sunday 14th March 2021

For Mother's Day our Children have been getting creative by making some rather 'English' themed cards and some beautifully decorated little cakes which they packaged up and made look very professional. It is lovely to feel appreciated so we hope that you mums enjoyed your gifts. ♥♥♥

Virtual Moving on Event on the school website from
1 March until 31 March

Providers of post 16 support have produced videos of their organisations, demonstrating what is available for young people after leaving school or college. The presentation is mainly aimed at students from year 9 onwards who are planning their next steps. However, the videos are very interesting and informative and are helpful for anyone wanting to see the opportunities available for young people with SEND

That is all from us. Have a wonderful weekend...See you Monday 😊
