

Maths

In maths, we will focus on exam skills as we prepare the students for their open awards exams. This will include mental arithmetic and calculator work in various contexts including money, shapes, fractions and decision mathematics.

English

In English we will continue to focus on exam skills as we prepare the students for their open awards exams, with a focus on grammar. As we near the end of the BFG, we will begin to read Harry Potter and the Philosopher's stone. This enchanting book will be the perfect backdrop for the students to develop their creative writing, poetry and instructional texts, all while focusing on the key skills of spelling, punctuation and grammar.

ICT

To prepare the students for their ICT exams we will begin to approach ICT in a more holistic manner. Students will be provided problems and challenges and will practice their word, excel and researching skills. There will continue to be an overarching focus on excel, in particular the use of the =sum() function.

Life Skills

Life skills is an essential part of the day-to-day of our class! This term students will get continuous practice preparing simple snacks and drinks as well as clearing up any mess made. In the life skills lessons, the focuses will include online banking, budgeting and food shopping.

PDE

After February half-term, the students will focus on puberty in PDE. They will gain a greater understanding of the changes their bodies and emotions have gone through, and how best to communicate how they're feeling. Alongside this there will be continued discussions around online safety and mental health.
